EDUCATION

- **National Institute of Technology** Warangal, Telangana
M.Tech in Engineering Structures; CGPA: 7.64 2019 – 2021
- **COEP Technological University** Pune, Maharashtra
B.Tech in Civil Engineering; GPA: 7.74 2014 – 2018

EXPERIENCE

- **Blue Yonder**
Software Engineer Aug 2024 - Present
 - **Platform Data Cloud**
 - * Designed and implemented backend features, including request handling enhancements and modular libraries, to improve system functionality and maintainability.
- **MyGate**
Software Engineer May 2023 - Aug 2024
 - **HomesP2P**
 - * Migrated HomesP2P (Mygate's home rental platform) from GCP Kubernetes Engine to AWS ECS (backend & frontend), including data from MongoDB & Elasticsearch and image storage from Firebase to S3. Consolidated AWS infrastructure reduced network costs by 35% & optimized image storage with S3 & ImageKit (replacing costly Firebase).
 - **Metrics System**
 - * Involved in the development of a robust Metrics System, leveraging Java and Spring Boot for most microservices, achieving a remarkable throughput of 60,000 requests per minute (rpm) and efficiently managing data from 3 million users. This system serves as a cornerstone in driving essential business decisions.
 - * Successfully orchestrated the migration from CleverTap to streamline the capture of user events, resulting in an impressive 25% reduction in operational costs.
 - * Contributed to the creation and optimization of the Appsmith dashboard, showcasing key metrics such as events, session information, and user counts, including Daily Active Users (DAU) and Monthly Active Users (MAU).
 - * Streamlined event management in the Metrics System by designing a user-friendly interface using Appsmith; resulted in a 40% decrease in time spent on adding and updating events, improving team efficiency.
 - **Society Dashboard**
 - * Involved in the development efforts for Lease Management pages, enabling clients to seamlessly onboard, while also streamlining the generation of leases for individual flats.

PROJECTS

- **Ecommerce** Developed a comprehensive E-commerce backend system with robust authentication, authorization, role management, seamless product cart integration, secure payment options
- **Expense Tracker** Standalone Expense Tracker system with, enabling seamless daily expense tracking and efficient report generation for personalized financial management.

PROGRAMMING SKILLS

- **Languages** JavaScript, Java, Python, PHP
- **Frameworks** NestJS, Spring Boot, Express.js, Drupal
- **Databases** PostgreSQL, MongoDB, MySQL, Redis, Elasticsearch
- **Cloud and Deployment** AWS, GCP, Docker, Jenkins, Kubernetes
- **Queues and Pub-Sub** RabbitMQ, AWS SQS
